Umbrella fabric material: 100% Polyester Made in China

⚠ Warning

- Be careful not to close the umbrella too vigorously, as the tip of the umbrella can hit others in the eyes.

○ Precautions for use

- Children should not use this product without supervision.
- Do not use this product outside of intended purpose of use.
- Do not store in direct sunlight, high temperature, or high humidity.
- Some parts of the umbrella are sharp. Make sure to check the safety of your surroundings during use.
- The umbrella is designed to have narrow rib intervals, which may result in pinching or injury. Do not insert your hands or fingers.
- The material will gradually lose its ability to repel water with repeated use.
To ensure long-lasting performance, use a commercially available water repellent spray.
When doing so, be careful so that the spray does not stain or discolor the material.
- Do not use in strong winds, as the umbrella may be damaged.
- While the umbrella may be used in rain, the seams of the umbrella may leak during heavy rain or prolonged use.
- Vigorously rotating the umbrella after use to expel water may damage the handle or runner.
- The ribs of the umbrella contain glass fiber (reinforced fibrous plastic).
Do not touch this fiber in the event that they are exposed due the umbrella being bent or damaged.

○ Product Care

- When drying, keep the umbrella out of direct sunlight.
Direct exposure to sunlight may cause fading or changes to the surface.
- Open and thoroughly remove humidity of the umbrella before storage.
Storing while still wet or with insufficient drying may cause the frame to rust, or the fabric to discolor or change.
